

JULIUS ASHER P. AUSTRIA

Bachelor of Science in Computer Science

AI and Software Developer with hands-on experience in machine learning, web development (Laravel, React), and software automation. Skilled in designing data-driven applications and intelligent systems that improve processes and solve real-world challenges. Motivated by innovation, continuous learning, and delivering impactful solutions through technology.

📄 Julius Asher P. Austria

EDUCATION

Laguna State Polytechnic University

Bachelor of Computer Science
Major in Intelligent Systems

ACHIEVEMENTS

- 2025 • **Summa Cum Laude** (Valedictorian)
- 2025 • UNIFAST Academic Excellence Award
- 2025 • Proficiency Award
- 2025 • Best Presenter in Research Congress
- 2024 • Iskolar ng Laguna

SKILLS

- AI/Machine Learning Model Development
- Front-end & Back-end Software Development
- React.js, Laravel, PHP, Python, C#, .NET, Java, Next.js
- Tailwind CSS, Filament, Android Studio, MySQL
- Microsoft Office (Word, Excel, PowerPoint, Outlook)
- Skilled in leveraging AI and automation tools

WORK HISTORY

Software Developer COS

Sept 2025 - Dec 2025

- Developed a web-based system intranet using Laravel and Filament framework.
- Designed and implemented optimized MySQL schemas and relational structures to support efficient data storage and retrieval.
- Ensure that all the requirements, expectations, and quality are met before the production.
- Collaborated with cross-functional teams to analyze potential organization problems and identify areas for improvement.

Project-Based (Commission)

2022 - Current

- Developed a desktop application in C# using Visual Studio designed to assess and improve children's skills and strength through an adaptive algorithm.
- Built wedding websites using Next.js with interactive RSVP systems and user-friendly designs.
- Communicated with clients and scheduled meetings to assess their needs and project requirements, ensuring clear understanding and alignment.

ACADEMIC PROJECTS

Aboveground Tree Biomass Estimator using AI Model

Developed an ensemble-based model with a prototype UI capable of estimating the biomass of a specific tree with a single click and annotation, enabling fast and accurate analysis.

Robot Line Follower

Designed and built a Line Follower Robot using Arduino UNO, integrating deep learning and computer vision for intelligent path tracking.
